TIPS—Download process is the same for eBooks whether they're free or a purchase
Only e-commerce (create account and payment info) are extra steps for purchase

Check website for rules on sharing purchased eBook files with other readers--
Kindle allows access across several of your devices, but not with other readers
B&N Nook allows limited sharing of purchased eBook

Why are some eBooks free?

Public domain books (before 1923 or no copyright) are available for free
New authors publish eBooks for publicity
Websites offer free eBook sample pages or a chapter as purchase incentive

Free and Purchased eBooks (unlike library catalog downloads) never expire—
Remain on computer or reader until deleted. You can share these EPUB files.

Download works on both Windows (XP and later) and Mac (OS 10.4 and later) systems Only one book can be downloaded at a time.

Step 1: Go to eBook website, browse and Select EPUB title

Step 2: Click *Download EPUB* button

Step 3: Popup box appears. Click *Save file*.

Step 4: Save EPUB file in *My Documents* and *My Digital Editions* folder
Download complete box appears when file is saved. (C drive)
Adobe Reader Library will open. You can now read this book on your computer.

Step 5: To copy EPUB file to your Reader device, open *My Digital Editions* folder in Cdrive. Select EPUB file to copy and copy file to E or F drive (where device is plugged)

Step 6: Go to *My Computer* and open your *Reader (E or F drive)* and click *Copy button*
EPUB file should now be saved both on your computer and on your Reader

Step 7: Unplug Reader device from computer, so it can synch, and add title

Step 8: Check Reader home page menu to confirm new title has been added.
