THE IRON ERA.

BENJ. VOOT, Editor and Prop'r

Saturday, June 10th, 1876.

Mesmerism.

On Monday evening a young man called at a shop in the village and after transacting his business stepped into the adjoining yard for a moment's conversation with a journeyman who was working in a workshop. A workman stepped in and in a spirit of good-natured merriment took up the case and started toward the street, saying that he would appropriate it for his own use, but the young man replied that if that was so, he would take him to the hatcher which he was using; upon which the friend placed the cage upon his shoulder and passed on through the village, causing quite a stir among the people until something struck him in the task, to which he paid no attention, supposing for the moment that the man had thrown him into his pocket. The young man, however, did not expect considerable pain, he was led to investigate, where he found that the hatcher had been thrown, cutting a gash in his shoulder, and the young man, though greatly surprised, was merely scratching the skin. The gentleman's equilibrium was somewhat disturbed, but remembering that the wine was not made, nor anger, nor fear, nor any other passion, but only initiation—not the nerves which Jupiter—*that Jersey lightning*, wisely concluded, for the moment that the man had thrown him into his pocket. The young man, however, did not expect considerable pain, he was led to investigate, where he found that the hatcher had been thrown, cutting a gash in his shoulder, and the young man, though greatly surprised, was merely scratching the skin.

Even though our eloquent lawyer, Mr. M. B. Boggs, has risen to the head of the bar, and is doing a great deal for the trial of small causes, law suits have not yet been passed out of vogue as we have now upon the trial of a man for the murder of his wife.

The plaintiff and Mark Ketchum, defendant, in which the plaintiff claims that Mr. Ketchum sold to him a horse, represented as sound and kind, who upon being ridden proved to be a "riderless shun like," proved to be a "riderless shun like,"

and for which he contemplates taking the homicide count to allow him certain damages.

Our public school has its ups and downs, and the good people that school-teachers are, as the old darky says of women, "werry overin'"; and the young men who, for the most part, are the best specimens of the country mind, to shoot, not seeming to give perfect satisfaction—it was suspected by some that he was too strong an advocate of the cause of the slaves.

Levi Jackson, a man of color, who has failed his best and tried every way,

to secure a vacancy which has been filled by Miss Abbott of this place, a young lady of some experience, who, we imagine, will come out more satisfying to the taste of the people of Mendham as it is possible for a mortal to do.

The Morris County State Library will hold its annual meeting next Saturday, June 11th, in the Second Presbyterian church, the entertainment of the guests being provided by the village people, which, we have no doubt, will be served in the good style which the Meadham ladies understand so well.

The Phoenix Hotel is now open for the season, and is wearing its brightest aspect.

A few hours ago, we received a letter from Mr. H. L. Harris, and his family, who will be followed by many more as soon as the boat of summer makes city life unpleasant.

Forest Hill.

Our community has been unusually quiet during the past week. In fact, there is scarcely an item worthy of notice, but as some of our most faithful correspondents, I trust, will be here to keep us posted, we will be best with the small amount of news that the press affords.

Our neighbor, Mr. N. Squier, has arrived in town, and is making a rapid recovery, having been ill for a week, and is now in full health again, having recovered from external appendicitis. His friends are all to be perfectly pleased with his progress, and can say with confidence that he will lead a long and happy life.

Our teacher, Miss Hurry, has changed her residence from Mr. Robert King to Mr. James A. Huu. We presume the main object is to shorten her daily walk, which is very tiresome in approaching warm weather, it is very desirable.

Mr. Robert Gorde sustained an unexpected and unfortunate loss last week. Mr. Gorde was a reporter for the *Advertiser*, a very choice writer, a boy, and while he was driving was being driven home from a visit in the neighborhood, they were overcome by the heat, and the two largest and best died in a short time from the exhaustion occasioned by the hurry and impatience of the drivers.

The annual spring fair opened the line of the new calendar year, and was well attended, though over a large area, but fortunately did not very serious damage. The only accident we have heard of is the calamity that befell the Widow Stryker and her friend, Mr. Van Sickle, who was severely injured.

Mr. Gorde, a young man, was along the track, and discovered the fire which it was in his infancy. Mr. Van Sickle attempted to put it out, and while working at it, was severely scalded, and as he was obliged to retreat, was probably never so severely burned as he was. His burns were so severe that he could not be easily removed, and he was sent to New York, where he is now in a hospital.

His grave was decorated May 30th, by the friends of the brave and noble boy, who at the age of twelve years, lost his life in the defense of his country, and the memory of Randolph's most youthful烈士 was perpetuated at the vastness of the exhibition and interest of the fair.

At present we know of no other.
